ST. LUKE'S HOSPITAL

On the eighteenth of February, 1864, under the leadership of Dr. Clinton Lock, Rector of Grace Church, occurred the founding of St. Luke's Hospital and later that year the Hospital became incorporated. The history of the growth of the Hospital from that time to the present well represents the interest and efforts made by the Boards of Trustees and friends of the Hospital.

A small frame house on State Street near Eldridge Court accommodating seven patients was the nucleus, later that year a nearby brick house was rented and facilities were provided for eighteen patients. In 1871 the Hospital moved to Indiana Avenue and occupied a part of the present site. A few years later steps were taken to erect a well designed hospital and by 1891 the capacity became one hundred and fifty-two beds. An urgent need for a private patient pavilion developed and in 1908 the "George Smith Memorial" was erected on Michigan Avenue with accommodations for one hundred and thirty patients.

A nineteen-story building on Indiana Avenue was completed in 1925 and provides for five hundred and forty patients. A portion of the older building still stands on Indiana Avenue but the new building occupies the greater frontage. In this building the entire second floor is allotted to educational and social activities of the School of Nursing and consists of classrooms, laboratory, assembly room and a very attractively furnished reception room. The three floors above are used as living quarters for the student nurses and are so arranged to insure privacy. "Stickney House," the present residence for nurses, was erected in 1898 and provides comfortable surroundings for the students.

St. Luke's Hospital is one of the large hospitals of Chicago that renders to the public the double service of a private institution where most efficient and luxurious hospital, medical and nursing attention may be enjoyed and at the same time expert care given free of charge to those unable to pay.

The capacity of the Hospital including the private pavilion is about six hundred and seventy beds. In the Social Service and Out-Patient Departments of St. Luke's Hospital, approximately thirty-three thousand patients were treated during the past year. Approximately fifteen thousand patients are treated annually by the following services:

ST. LUKE'S HOSPITAL MAIN OFFICE, MICHIGAN AVENUE

Laryngological
Orthopedic
Neurological

SCHOOL OF NURSING

History and Organization

The School of Nursing of St. Luke's Hospital organized in 1885, is an integral part of the Hospital and governed by the same Board of Trustees. Six nurses graduated in 1887 as the first class, and with that beginning the enrollment of students gradually increased until at the present there are approximately sixty students graduating each year. The school is in its forty-fourth year, over twelve hundred nurses have received diplomas, many of whom have filled or are now filling responsible positions of leadership in all parts of the country. This development came about to meet the needs of the nursing service for St. Luke's Hospital and to meet the growing demand of communities for well qualified women in all branches of nursing.

It is the purpose of the School of Nursing to provide scientific instruction and experience not only in the nursing care of the sick and in teaching of students in schools of nursing, but also for service in the varied field of Public Health Nursing.

Admission

Candidates desiring to enter the School of Nursing may secure complete information by applying to the Director of Nursing. If possible, a personal interview should be arranged. Blanks will be supplied upon request. Applicants must be between nineteen and thirty-five years of age and must furnish evidence of physical fitness and good character. They must also present credentials of graduation from a four year accredited high school or its equivalent. Selection of students is based on general fitness, considering scholastic and personal qualifications.

Credit, either in time or courses, or both, is given to candidates who present evidence of advanced educational or professional preparation.

Classes are entered in the early part of February and Sep-

tember. The complete application should be forwarded to the Director of Nursing at least two months prior to the date of enrollment.

Expenses

No charges are made for tuition. Students receive board, lodging and laundry from date of entrance, but are required to purchase their own text books. The cost of books for the three years will amount to about thirty-five dollars. At the time of entrance over half of this amount will be needed to purchase books used during the first semester.

During the preliminary term, students provide their own uniforms and aprons, after which the school uniform is supplied. During the three years in the school, the student is expected to meet her own personal expenses which depend on her own tastes and needs.

Illness

When ill, the students are cared for by a member of the Medical Staff. Time lost because of illness or necessary absence must be made up.

Vacations and Absence

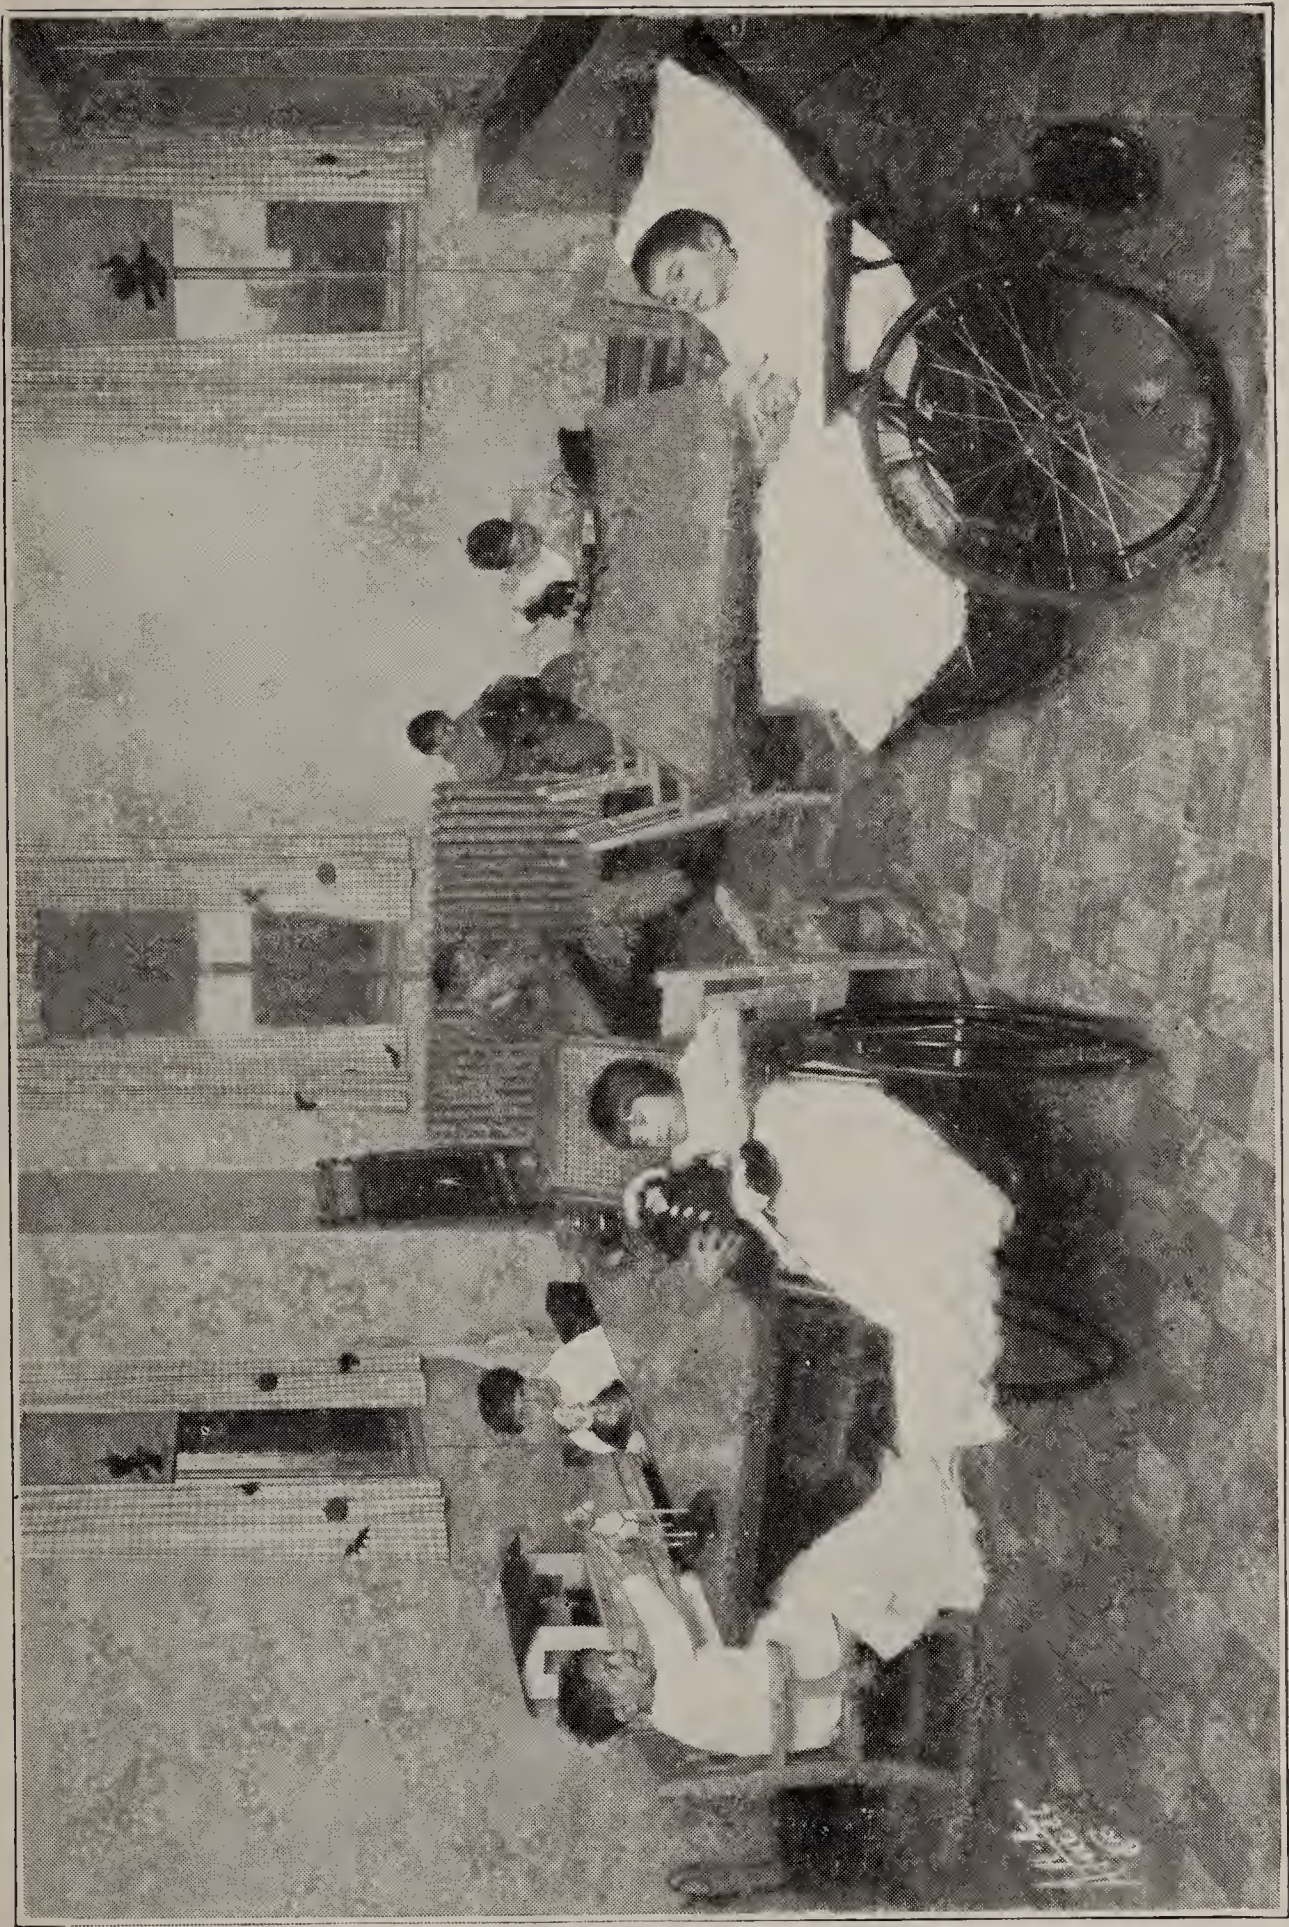

Students are allowed a yearly vacation of twenty-eight days. The time at which vacations are given is influenced by the needs of the Hospital. It is not expected that the students will obtain a leave of absence for any but the most unavoidable reasons.

Schedules of Hours on Duty

During the Preliminary Term the students are on duty in the general wards two hours daily. For the remainder of the course the students are on duty in the wards and various departments of the Hospital for fifty-two hours to fifty-six hours per week. Each student is given a half day off duty during the week and on Sunday.

Religious Influences

While St. Luke's Hospital is an Episcopalian institution, the question of creed never enters into its work, either as to patients or the selection of students in the school. Students are required to attend daily chapel services, conducted by the Chaplain. Grace Episcopal Church is now closely affiliated with St. Luke's Hospital and has recently completed a beautiful new church on Indiana Avenue adjoining the Hospital. Students are encouraged to attend church services of their preference at least once on Sunday.

KINDERGARTEN

Student Activities

The social activities of the school are largely under the direction of the Social Welfare Director. Each class has its own organization and throughout the year many special parties and teas are enjoyed. The Young Women's Christian Association of St. Luke's Hospital has a large and active membership and sponsors lectures, picnics and athletic activities. It is an Inter-Collegiate branch of the Young Women's Christian Association of Chicago.

A glee club and orchestra have been organized for students who are interested in music. Regular practice periods under the leadership of a well known director of music make this a very valuable opportunity.

Members of the Woman's Board of St. Luke's Hospital have the welfare of the students at heart and assist in making the social and home life of the students attractive and comfortable.

Graduation

The diploma and pin of the school are granted to students who have successfully completed the required course in nursing. Commencement exercises are held at the close of the school year. The hospital and school continue to be interested in the nurse after graduation and endeavor to give her assistance in securing desirable positions in the phase of nursing she is best qualified to enter.

Scholarships

In order to encourage advanced study in Administration, Supervision or Teaching, the Woman's Board of St. Luke's Hospital annually award two scholarships to graduates of the School of Nursing. One scholarship of the value of two hundred and fifty dollars is awarded for post graduate study at the University of Chicago. One scholarship of the value of twelve hundred dollars has been established to be awarded to a graduate who desires to secure post-graduate work at Teachers' College, New York. The above scholarships are given to graduates whose work has been of exceptional merit.

Registration

In order to practice as a Registered Nurse, graduates are required to pass the examination given by the Department of Registration and Education of the State of Illinois. This entitles the nurse to registration by reciprocity or examination in other states.

Alumnae Association

All graduates of the school who are in good standing and are registered nurses are eligible to membership in the St. Luke's Hospital Alumnae Association. This association was organized in 1897 and is most helpful in maintaining high professional standards among the graduates of the school. Membership in the Alumnae Association admits the graduate to the district, state and national nursing organizations. She is also eligible for membership in the American Red Cross Nursing Service and the Army and Navy Nurse Corps.

General Plan of Instruction

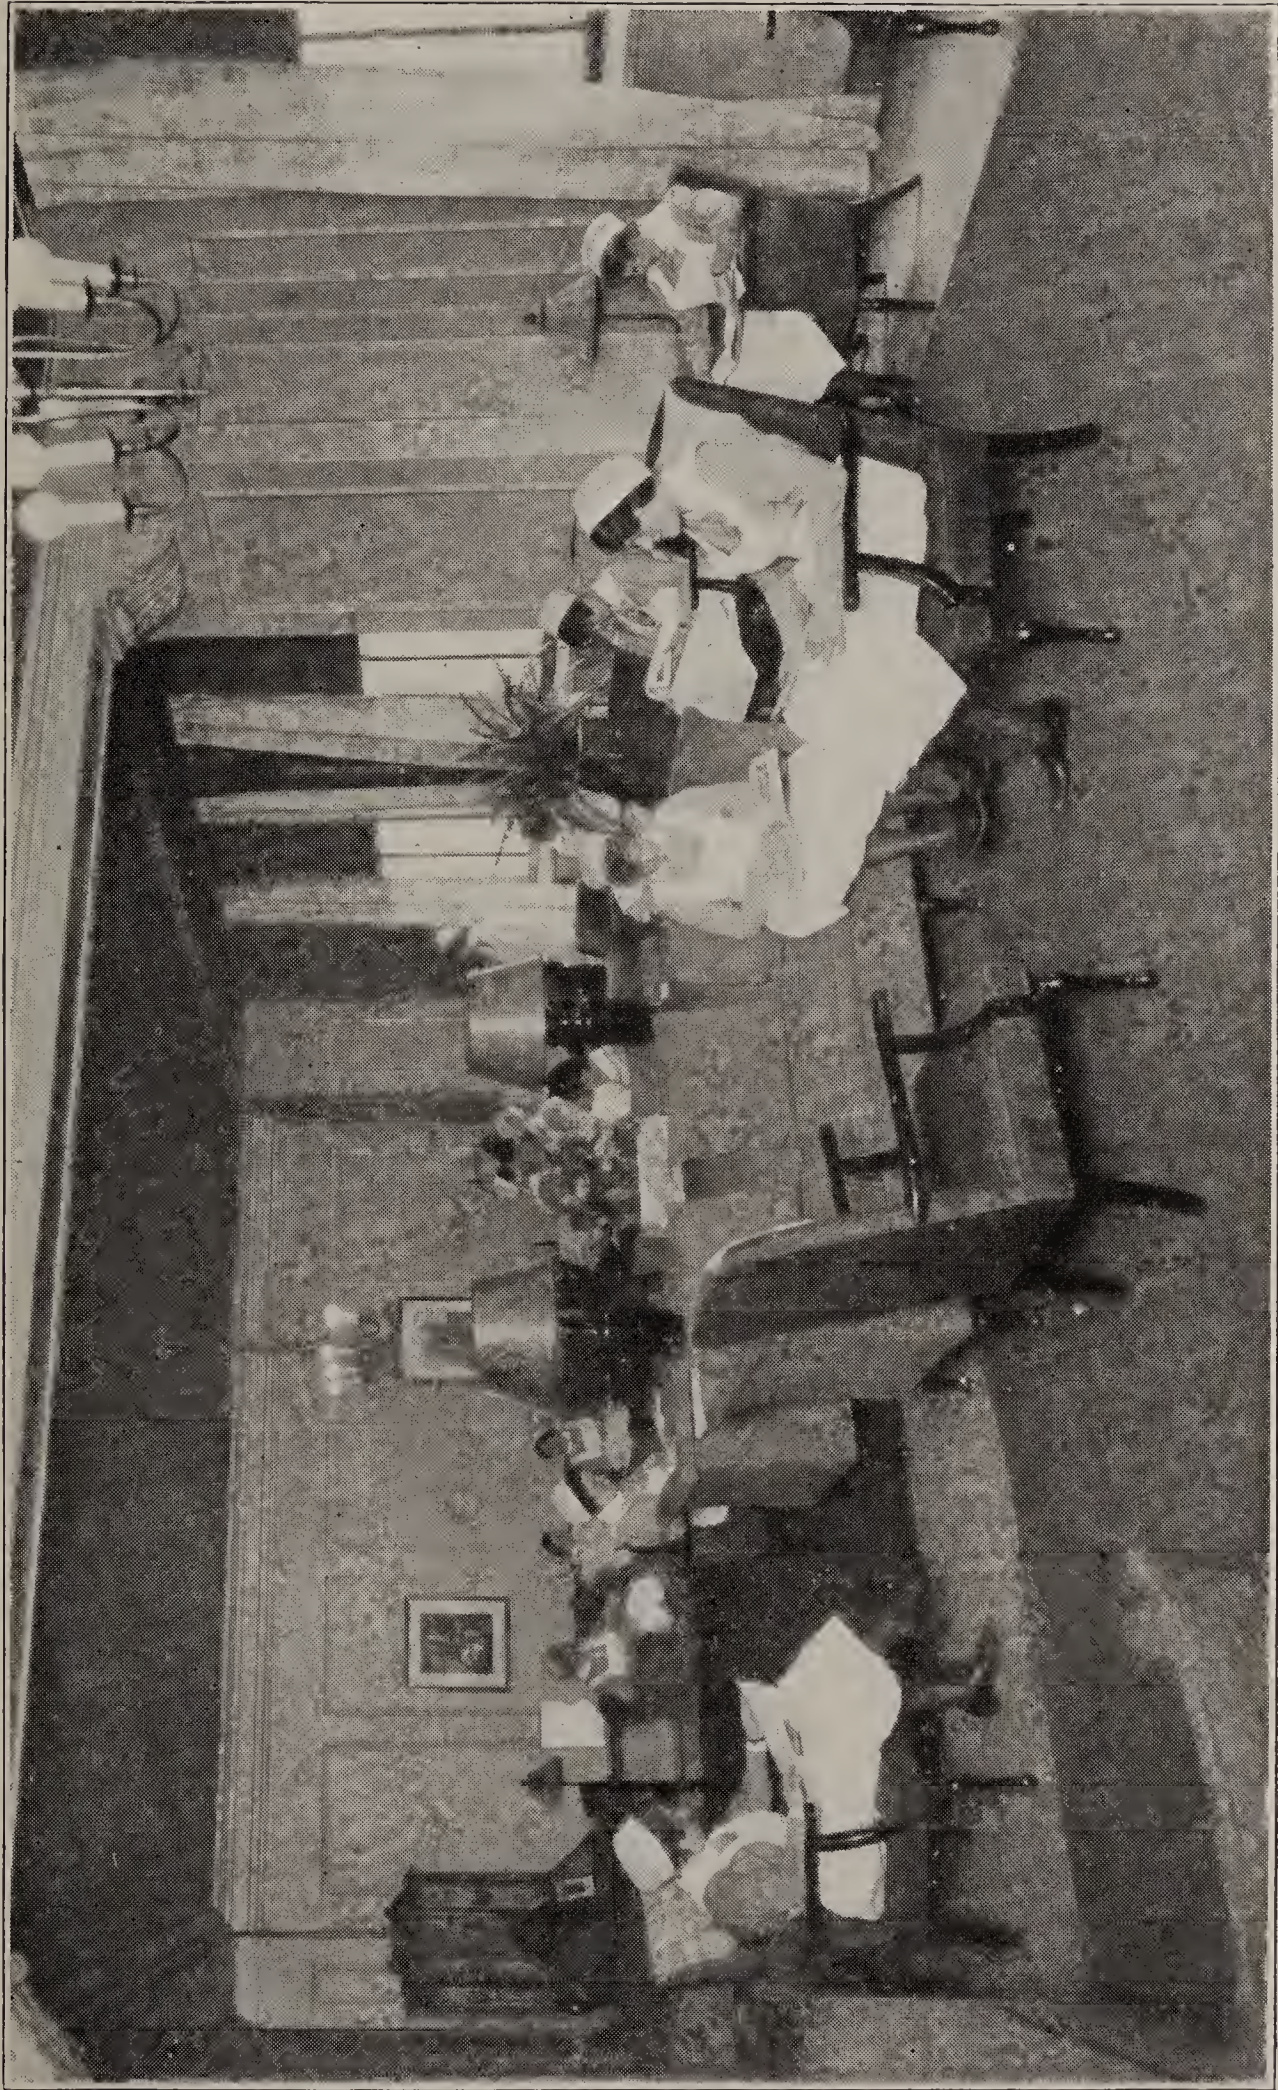

The course of instruction in theory and practice of nursing covers a period of three calendar years.

First year. First Semester. The aim during the preliminary period or the first five months is to develop in the student a sound knowledge of the elementary nursing procedures. Theoretical courses covering the sciences necessary to a proper understanding of elementary nursing are also given during this period. The students spend about six hours in the class rooms and laboratories of the school and two hours daily in ward practice under constant supervision. At the close of the first semester, if the students satisfactorily pass both written and practical tests and demonstrate a general fitness for nursing, they are accepted as regular students in the school and are given the regulation uniform.

First year. Second Semester. During the second semester the student is assigned regular duties in the hospital in the general medical and surgical services. Lectures, demonstrations and clinical studies are continued, correlating as far as possible with nursing practice.

Second Year. In the second year the student is prepared for greater responsibilities by instruction, both practical and theoretical, in advanced nursing. Experience in the dietary department, children's services, orthopedic department and operating rooms is included during the second year.

Third Year. Lectures and demonstrations on the most advanced nursing subjects are given during the third year. This also includes special lectures on important topics related to nursing. Experience in special services including eye, ear, nose and throat, obstetrics, out-patient department and social service, is given during the third year.

NURSES' RECEPTION ROOM

In the last half of the third year students who have shown special ability in executive work or teaching are permitted to elect additional experience for a period of two or three months in the departments in which they are most interested. To a limited number of senior students wishing to prepare for Public Health Nursing, two months' experience is available with the Visiting Nurse Association. Arrangements are also being made for elective work in Psychiatric Nursing and in Communicable Disease Nursing.

CURRICULUM

FIRST YEAR

FIRST SEMESTER

Elementary Principles and Practice of Nursing: 120 Hours

Lectures, demonstration and classroom practice of the procedures used in the care of the sick. This also includes the fundamental principles of bandaging and the application of the commonly used methods of bandaging. The class room practice is closely correlated with practice on the wards under supervision.

Pearl Crawford, R. N.; Gertrude Ames, R. N.; Sara Warner, R. N.

History and Ethics of Nursing: 30 Hours

This course is designed to acquaint the students with the leaders of the nursing profession, their ideals, and the many obstacles overcome by them; to explain the meaning of hospital regulations and the ideals of the behavior from which these have grown; to assist the student in forming her philosophy of life to the end that she may live happily and usefully.

Mrs. Ada Reitz Crocker, R. N.; Ruth Poindexter, R. N.

Anatomy and Physiology: 90 Hours

This course describes in as simple a manner as possible the phenomena of life, and the principal conclusions which have been reached as to their interdependence and cause. It aims to stimulate, by means of lectures and laboratory periods, an interest in and an appreciation of the structures and functions of the human body as an efficient machine, and to provide a foundation for the study of allied nursing subjects.

Bess Patton, R. N.

Bacteriology: 45 Hours

This includes the characteristics and habits of pathogenic and non-pathogenic micro-organisms. While the course primarily aims to lay stress on the transmission of disease it does not fail to point out that the ability to produce disease is limited to comparatively few species and that by far the greatest number of these infinitesimal forms of life perform beneficent tasks. With lectures and laboratory periods a knowledge is established by which the student is better able to protect her patients, herself, and the public from infection.

Bess Patton, R. N.

Drugs and Solutions: 20 Hours

A study of drugs used as disinfectants and antiseptics, and the methods and practice in making common solutions, to furnish a basis for the study of *Materia Medica* and *Therapeutics*.

Ruth Poindexter, R. N.

Chemistry: 45 Hours

An elementary study of General and Applied Chemistry as the keystone science upon which are built other sciences such as Dietetics, Physiology, Bacteriology, *Materia Medica*, etc. Throughout the course considerable time is devoted to the Chemistry of the life processes, an adequate conception of which is so important to all and is especially essential in the fields of nursing and medicine.

Jeannette Crittenten, A. B., M. S.

Personal Hygiene: 15 Hours

To show how diseases may be prevented and health promoted by a knowledge and practice of personal hygiene.

Ruth Poindexter, R. N.

Psychology: 30 Hours

The object of this course is to give the student a better understanding of the sick, and to introduce the most economical methods of learning.

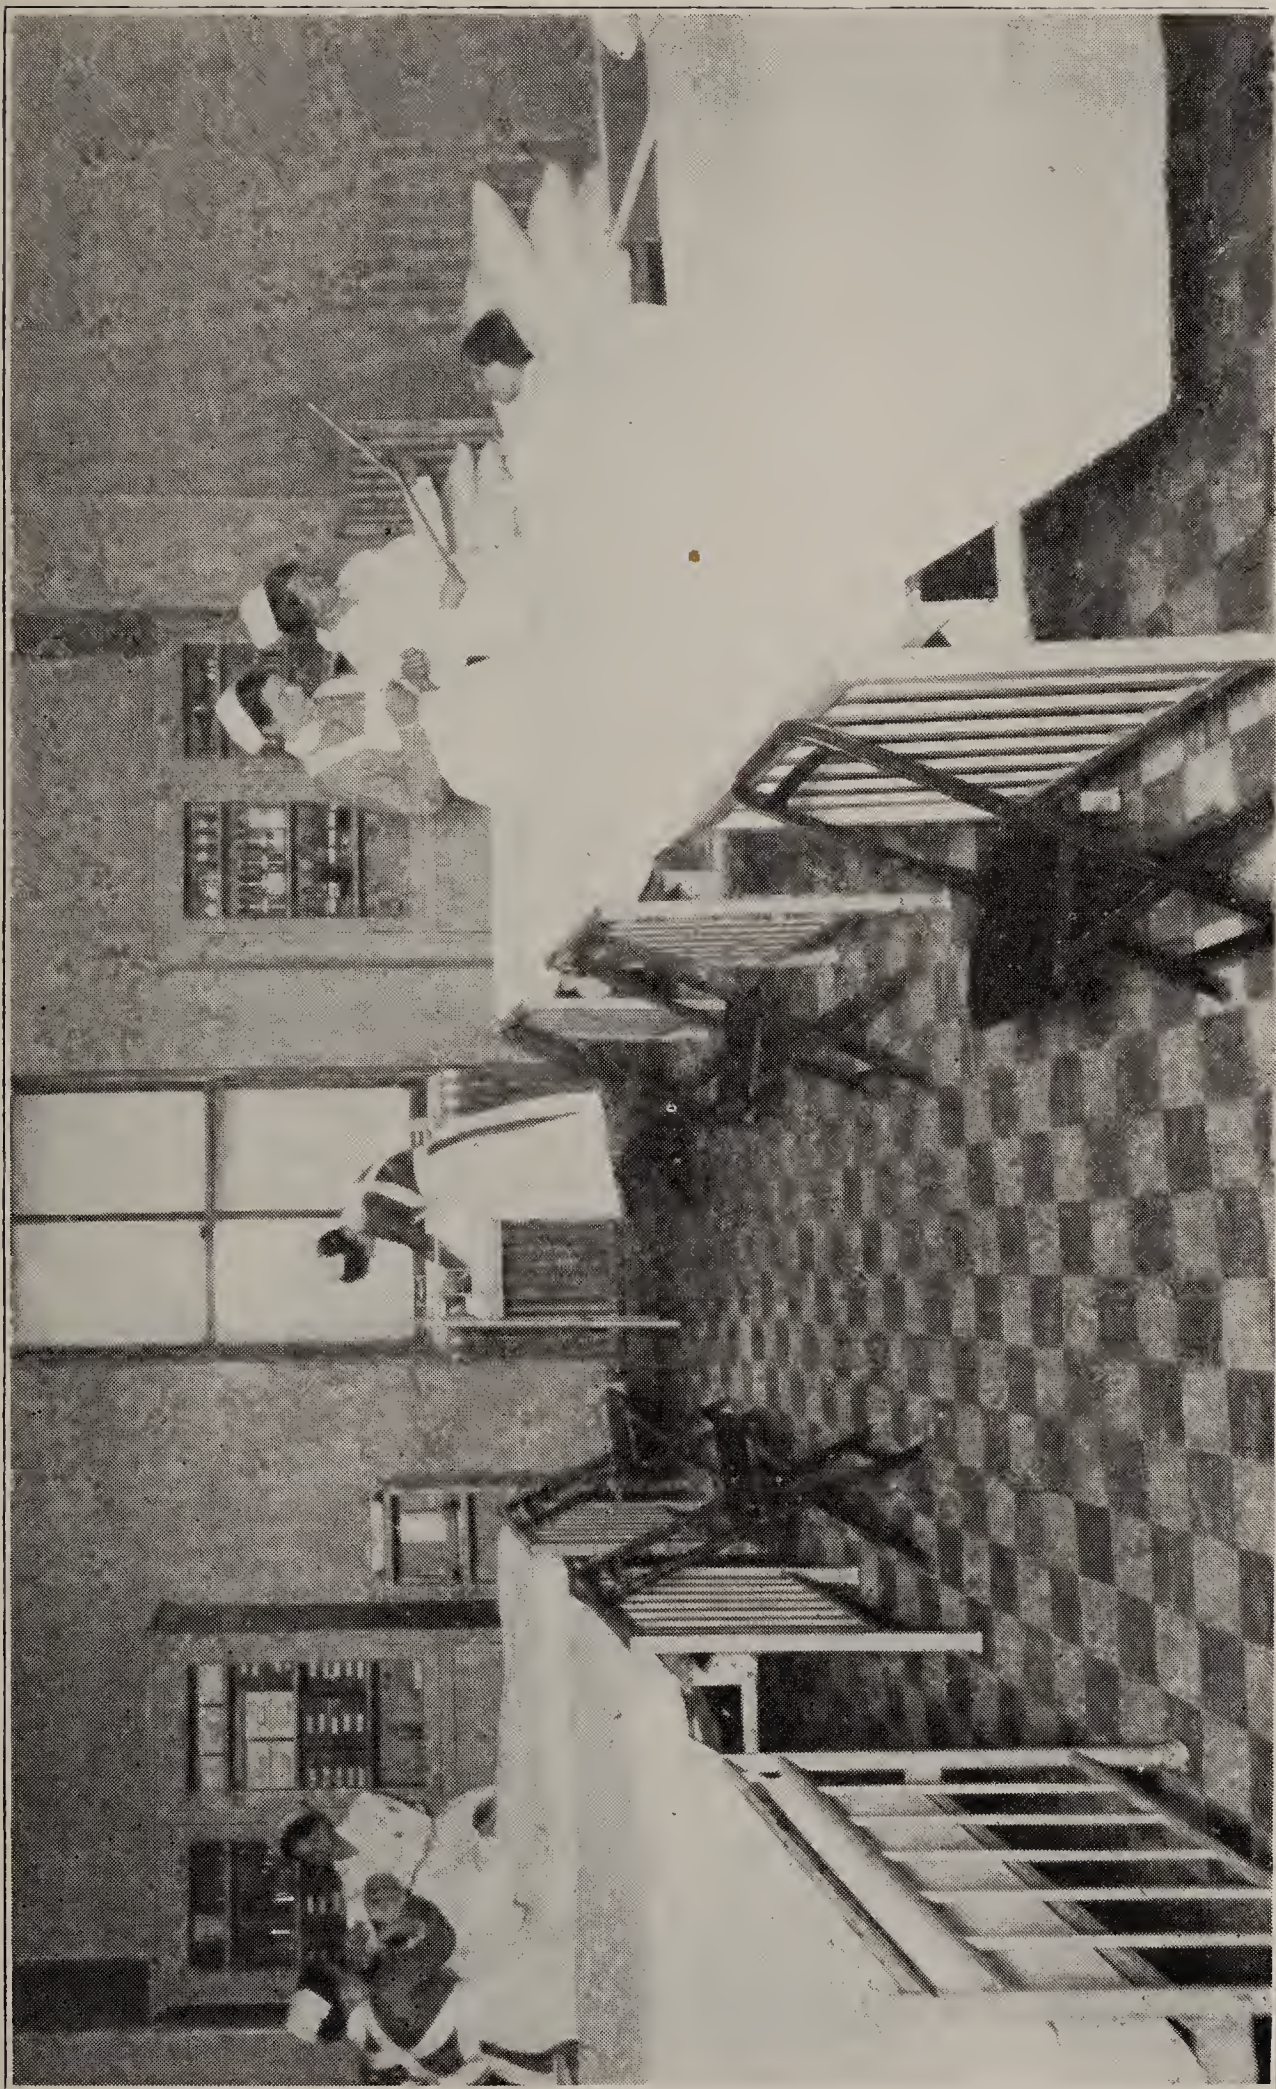

Ruth Poindexter, R. N.

SECOND SEMESTER

Nutrition and Cookery: 45 Hours

This is a course in elementary Dietetics which affords study of foods and their values, principles of cookery, and preparation of simple foods.

Mary K. Sorensen.

DEMONSTRATION ROOM

Diet in Disease: 15 Hours

Application of the principles of nutrition and cookery in certain special diseases.

Mary K. Sorensen.

Pathology: 15 Hours

This course deals with the causes of diseases and the changes produced in the body by disease. It takes up the various kinds of specimens required and the relationship of the condition of the specimen to disease.

H. F. Meyer, M. D.

Materia Medica: 30 Hours

A continuation of the study of drugs, their source, their action upon the body, the form in which they are administered and their dosages; the particular diseases for which they are valuable, and the effect and treatment of an overdose.

Ruth Poindexter, R. N.

Medical Diseases: 30 Hours

This includes: (a) Lectures by physicians on the more common diseases, with special reference to symptoms, treatment and nursing care; (b) classes by nurse instructor in nursing measures employed in care of medical patients.

Surgical Diseases: 20 Hours

Includes: (a) Lectures by a surgeon on the more common surgical diseases, including emergencies and first aid; (b) classes by nurse instructor in surgical nursing and the use of surgical appliances.

Selim McArthur, M. D.; Evelyn Van de Steeg, R. N.

SECOND YEAR

Orthopedics: 10 Hours

This course consists of lectures on deformities of the bones, curvature of the spine, infantile paralysis, etc., with corrective procedures and demonstrations in the use of appliances.

Philip Lewin, M. D.

Gynecology: 15 Hours

Lectures and classes covering a review of the anatomy and physiology of the pelvic organs; the diseases, their causes, symptoms and treatment. General nursing care and post-operative care are stressed.

H. O. Jones, M. D.; Ruth Gamber, R. N.

Operating Room Technique: 10 Hours

Includes instruction in the conduct of an operating room as to personnel, equipment, procedure, etc. There are demonstrations in preparation of the patient for operation, care during and immediately following operation until patient is placed in bed.

Marie Charlotte Ante, R. N.

Communicable Diseases: 15 Hours

In this course, the student is given an understanding of the symptoms and treatment of the more common communicable diseases. By means of demonstrations and classes in technique, the nurse is taught the exact procedure of caring for a patient in order that she may protect herself and prevent the spread of the disease.

George K. Fenn, M. D.; Pearl Crawford, R. N.

Pediatric Nursing: 20 Hours

To help the nurse to understand the physical and mental development and the care of sick and well children, and to develop in the nurse the knowledge of the skillful management of maternal and artificial feeding.

Stanley Gibson, M. D.; Harold Bachman, M. D.; Ruth Perkins, R. N.

Obstetrical Nursing: 30 Hours

The study of the care of the maternity patient from the beginning of pregnancy through the puerperium. This course stresses prenatal care and the care of the newborn to impress upon the nurse her part as an educational factor in decreasing the death rate in infants and mothers.

James Gough, M. D.; Flora Swett, R. N.

THIRD YEAR

Oral Hygiene: 5 Hours

This course gives a review of the anatomy of the teeth; diseases of the mouth, teeth, and jaws; care of the teeth in health and disease.

E. W. Merrifield, M. D.

Ear, Nose, Throat: 6 Hours

The diseases to which these structures are subject, their nursing care and treatment.

Horace Lyons, M. D.; Elizabeth Shaffer, R. N.

The Eye: 6 Hours

This course gives the anatomy of the eye and the nursing care in the various diseases of that organ.

Sidney Walker, M. D.; Elizabeth Shaffer, R. N.

Mental and Nervous Diseases: 20 Hours

Lectures on nervous diseases supplemented by class discussions on mental hygiene for the purpose of giving the student a wider knowledge of human nature and a deeper understanding of the forces operative in her own life and in the lives of others.

George W. Hall, M. D.; Ruth Poindexter, R. N.

Dermatology: 5 Hours

Lantern views—description and treatment of the more common skin affections.

Edward Oliver, M.D.

Urology and Venereal Diseases: 10 Hours

Diseases of the genital and urinary systems.

L. L. Veseen, M. D.

Elementary Sociology: 10 Hours

This course is arranged to give the student an understanding of modern community problems and to emphasize the close relationship between health and social problems. Also to furnish a knowledge of the background and environment from which the hospital patient comes.

William L. Bailey, M. A., Associate Prof. of Sociology, Northwestern University.

Survey and Nursing Field and Professional Problems:

20 Hours

Lectures, classes and discussions relating to the various fields of nursing, including present day nursing problems. In this course an effort is made to arouse an interest in professional organizations and publications.

Mrs. Ada Reitz Crocker, R. N.
